

Technology

Professional, approachable
and dedicated to client care

“Being a technology business often means innovation, fast pace of change, high-growth potential and global competition. We understand how these issues drive what you require of us.”

specialism[®]

Our aim is to help you stay nimble and dynamic by supporting you with experts in accounting, audit, corporate tax, corporate finance, outsourcing, succession planning and wealth management.

Our services

Taxation

Tax planning

International tax planning, R&D tax credits, share options, EMI schemes and tax-efficient staff retention and motivation schemes.

Business Advice

Consultancy

Managing risk, management reporting, organisational change, restructuring and incorporation, debt and cash-flow management.

Budgeting and cash flow

Managing cash flow and financial forecasting.

Project evaluation

Financial evaluation of projects including risk analysis and presentation of the results to your management team, investors and banks.

“We advise a large and growing portfolio of IT and telecoms, new media, biotech, meditech and electronics and instrumentation companies.”

Key staff retention and motivation

Advising on share schemes and other employee benefits that help you retain and motivate your most valued staff.

Corporate finance

Mergers and acquisitions, disposals and succession planning, business valuations and raising finance.

International connections

As a member of Praxity, an international alliance of independent accounting firms, we can connect you to a network that extends to over 65 countries.

Private Client

Wealth management

Helping you protect and enhance your wealth. We'll also advise on revenue recognition, income and capital gains tax planning.

Accounting

Management reporting

Revenue recognition, international reporting and outsourced management accounts.

Audit and assurance

Experience of technology audits allows us to minimise disruption and provide a meaningful assessment of your business performance.

Due diligence for growth or new investors.

“Our approach is about adding value.
We believe that understanding you and your industry, combined with technical expertise, enables us to deliver innovative solutions to the issues you face.”
