# Aegon Absolute Return Bond Fund

a sub-fund of Aegon Asset Management Investment Company (Ireland) plc

Sterling Class C - Accumulation shares (ISIN: IE00B6SLQ646)

## Objectives and investment policy

**Objective:** is to generate positive absolute returns for investors over a rolling 3 year period irrespective of market conditions.

**Policy:** invests worldwide in:

- Investment grade (lower risk) and high yield (higher risk) bonds issued by companies and governments;
- Derivatives (financial contracts whose value is linked to an underlying asset);
- Cash, deposits and money market instruments (a form of debt security); and
- Up to 20% in a combination of investments in emerging markets (those economies that are still developing) and high yield (higher risk) bonds.

The Fund is actively managed.

The Fund has discretion in its choice of investments and is not restricted by market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.

The Fund may use derivatives for investment purposes, to benefit from changes in the price of an underlying asset without actually owning it.

The Fund may use investment techniques to manage risks and costs. These techniques include 'hedging' (using derivatives and other financial contracts to reduce the risk associated with: (i) making investments in other currencies; or (ii) interest rates changing). Up to 5% of the Fund may not be 'hedged' i.e. the Fund is exposed to the risks of investing in another currency for this portion.

The Fund may hold substantial amounts of cash to implement investment techniques or meet its objective.

**Benchmark:** The Investment Manager expects that the Fund will return performance in excess of LIBOR GBP 3 month plus 2 to 3% on an annualised basis over a rolling 3 year period, net of fees. Although the Fund expects to reach this level of performance, there is no guarantee that this will be achieved. The Fund's capital is at risk meaning that the Fund could suffer a decrease in value at any time. For currency hedged share classes, the benchmark is shown in the share class currency.

## Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

**Recommendation:** the Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

## Risk and reward profile

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because of its investment strategy, the value of 'absolute return' funds may not change in line with bond prices.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'. Positive returns are not guaranteed and no form of capital protection applies.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

**Credit:** An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.

**Liquidity:** The Fund's value may fall if bonds become more difficult to trade or value due to market conditions or a lack of supply and demand. This risk increases where the Fund invests in high yield bonds.

**Counterparty:** Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the Fund due to events beyond our control. The Fund's value could fall because of: (i) loss of monies owed by the counterparty; and/or (ii) the cost of replacement financial contracts.

**Other markets:** The Fund may invest in countries which have less developed political, economic and legal systems and which provide fewer investor protections. Difficulties in buying, selling, safekeeping or valuing investments in such countries may reduce the value of the Fund.

**Derivatives:** The value of derivatives depends on the performance of an underlying asset. Small changes in the price of that asset can cause larger changes in the value of the derivative. This increases potential gain but also potential loss.

**Interest Rate Risk:** Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges	0.34%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.

The ongoing charge is based on expenses for the year to 31 December 2019. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Exchanging your holdings into another sub-fund of the Company: 1st 5 in any calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.

More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus.

## Past performance

Source: Lipper

Past performance is not a guide to future performance.

Fund launch date: 30 September 2011

Share class launch date: 07 February 2012

Performance is calculated in GBP.

The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the 'Charges' section.

# Allianz UK & European Investment Funds -Allianz Strategic Bond Fund Share Class I (Acc) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB00BJ1DZT42

## Objectives and Investment Policy

The Fund aims to maximise total return primarily through investment directly in debt securities or by gaining exposure indirectly through the use of derivatives. The Fund will invest globally although at least 80% of its assets shall be invested in GBP denominated (or hedged back to GBP) debt securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest up to 100% of the Fund's assets into conventional fixed income securities and indirectly through the use of derivatives. Up to 50% of the fund's assets may be in high yield securities and unrated securities of similar credit quality. More than 35% of the value of the property of the Fund may be invested in securities issued or guaranteed by the following states; the UK, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal,

Spain, Sweden, Switzerland and the United States of America. Up to 30% of the fund's assets may be in China via RMB currency exposure. We may also invest up to a maximum of 10% of the Fund in collective investment schemes. The Fund will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day by 12:00.

We reinvest the income into the fund.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

## Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

### Why is the fund in this category?

Past data for this share class is not available yet. The analysis of the share class' potential target asset mix allocation has revealed that the share class should be assigned to category 4. Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up

and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.

## Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

### One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

### Charges taken from the fund over a year

Ongoing Charges	0.45%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on “large deals” (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

## Past Performance

We do not yet have performance data for one complete year. Therefore we can not provide a useful indication of past performance to you.

## RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund’s future risk profile.
- A risk indicator of “1” does not mean that the investment is “risk free”.

### The risk indicator may not fully take into account the following risks and the following may affect fund performance:

- Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- Currency risk:** The fund’s assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund’s value.
- Derivatives risk:** The fund may invest in derivatives with the aim of profiting from falling (‘shorting’) as well as rising prices. Should the asset’s value vary in an unexpected way, the fund value will reduce.
- Concentration risk:** The fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.
- Smaller companies risk:** Investing in small and medium-sized companies can involve more risk than investing in larger, more established companies. Shares in smaller companies may not be as easy to sell, which can cause difficulty in valuing those shares.
- Credit risk:** Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

Please refer to the fund’s prospectus for full details of these and other risks which are applicable to this fund.

- **Currency risk:** The fund’s assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund’s value.
- **Special situations risk:** The fund invests in companies that are in recovery, need re-financing or are suffering from lack of market attention (special situations). These companies are subject to higher-than-average risk of capital loss.
- **Credit risk:** Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- **Higher-yielding bonds risk:** The fund may invest in higher-yielding bonds, which may increase the risk to capital. Investing in these types of assets (which are also known as sub-investment grade bonds) can produce a higher yield but also brings an increased risk of default, which would affect the capital value of the fund.

Please refer to the fund’s prospectus for full details of these and other risks which are applicable to this fund.

### BlackRock European Absolute Alpha Fund

Class D Accumulating GBP

ISIN: GB00B4Y62W78

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The investment strategy of the Fund is deemed by the Manager to be capacity constrained and therefore, when the net asset value of the Fund reaches £700,000,000, units in the Fund will not be available to buy until further notice except at the discretion of the Manager (you will still be able to sell your units daily).
- ▶ The Fund aims to achieve positive absolute returns on your investment (i.e. an increase in the overall value of the Fund) over a period of 12 months regardless of market conditions. As such, the Fund will not be managed against any European equity index.
- ▶ The Fund will be managed with the aim of delivering absolute (more than zero) returns on a 12 month basis in any market conditions. However, an absolute return is not guaranteed over a 12 month or any period and the Fund may experience periods of negative return. The Fund's capital is at risk.
- ▶ The Fund aims to gain investment exposure to equity securities (e.g. shares) and equity-related securities of, or giving exposure to, companies incorporated or listed in the European Economic Area and Switzerland.
- ▶ In order to achieve its objective the Fund invests at least 70% of its total assets in derivatives, equity securities and other equity-related securities and when determined appropriate fixed income (FI) securities (such as bonds), money-market instruments (MMIs), deposits and cash.
- ▶ Equity-related securities include derivatives. Derivatives are investments the prices of which are based on one or more underlying assets. MMIs are debt instruments with short-term maturities.
- ▶ The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- ▶ At any one time, a substantial amount, or even all of the Fund's assets may be held as cash to provide cover for the exposure created by the use of derivatives or to assist in achieving its investment objective.
- ▶ The investment adviser (IA) will use derivatives to achieve the Fund's investment objective. These will include synthetic short positions where the Fund uses a derivative to benefit from the sale of an asset which the Fund does not physically own with the aim of buying it later at a lower price to secure a profit.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. LIBOR 3 Month (GBP) should be used by unitholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can sell your units daily. Units, whilst available for purchase, can be bought daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 26 August 2020. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

## BMO UK Property Feeder Fund

Share Class: 2 Acc, (ISIN GB00BWZMHM55).  
This Fund is managed by BMO Fund Management Ltd.

### Objectives and investment policy

The investment objective of the Fund is to provide income and capital growth.

The Fund will invest all or substantially all of its assets in the shares of the BMO UK Property Fund ICVC. To the extent that the Fund is not fully invested in the BMO UK Property Fund ICVC the Fund will hold its remaining assets in cash. The BMO UK Property Fund ICVC is a property authorised investment fund which invests mainly in a diversified portfolio of commercial property.

Any income earned by this unit class will be reinvested back into the unit class to grow the value of your investment.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell units daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

### Risk and reward profile

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The value of your investment may fall as well as rise.

You need to be aware of the following risks before investing:

**Property Risk:** the value of such investments is likely to reflect valuations of property assets as determined by professional valuers. Such valuations are the opinion of the valuer at a particular time, may not be supported by recent transactions and are liable to revision, up or down.

**Fund Liquidity Risk:** the ability of the Fund to meet redemptions within normal settlement terms depends on the readily realisable assets held in the Fund. If properties have to be sold quickly this could result in lower prices being obtained for them.

**Liquidity Risk:** the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

**Restricted Diversification:** investments are concentrated in direct property in the UK. These investments are limited to a relatively narrow segment of the economy. Performance may differ in direction and degree from that of the stock market.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

The ongoing charges figure is at 30/11/2019

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section entitled Fees and Expenses in the Fund's prospectus, which is available at [www.bmogam.com](http://www.bmogam.com).

**BNY MELLON**  
INVESTMENT MANAGEMENT

# BNY Mellon Global Dynamic Bond Fund

**INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B8H50V47)**

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

## Objectives and Investment Policy

### OBJECTIVE

To maximise the total return, comprising income and capital growth. The Fund is managed to seek a minimum return of cash (1 month GBP LIBOR)+2%per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

### POLICY

#### The Fund will:

- invest anywhere in the world;
- invest in emerging markets;
- invest predominantly (meaning at least 75% of the portfolio) in a broad universe of bonds and similar debt investments (i.e. bonds issued by governments, companies and other public entities);
- invest in bonds which at the time of purchase may have a minimum credit rating of BBB- as rated by Standard & Poor's (or equivalent recognised rating agency) or if unrated, have been determined by the Investment Manager to be of an equivalent quality;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and
- limit investment in other collective investment schemes to 10%.

#### The Fund may:

- invest more than 35% of its assets in government and public securities (those issued or guaranteed by a single state, local authority or public international body); and
- invest significantly in cash and cash-like investments.

**Benchmark:** The Fund will measure its performance before fees against 1 month GBP LIBOR +2% per annum over five years as a target benchmark (the "Benchmark").

LIBOR is the average interbank interest rate at which a large number of banks on the London money market are prepared to lend one another unsecured funds denominated in British pounds sterling. The Fund will use the Benchmark as a target for the Fund's performance to match or exceed because it is representative of sterling cash and the Fund's investment objective is to seek a minimum return of sterling cash +2% per annum.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies as disclosed in the Prospectus.

### OTHER INFORMATION

**Treatment of income:** net income from investments will be retained within the Fund and reflected in the value of your shares.

**Dealing:** you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 10,000,000.

## Risk and Reward Profile

Lower risk  
Potentially lower reward

Higher risk  
Potentially higher reward

1 2 3 4 5 6 7

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 3 because its historical value has shown moderately low volatility. With a Fund of category 3, you have a moderately low risk of losing money but your chance for gains is also moderately low.

### THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Performance Aim Risk:** The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a

higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.

- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Geographic Concentration Risk:** Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.

- **Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- **CoCo's Risk:** Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down,

temporarily or permanently, and/or coupon payments ceasing or being deferred.

- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

## Fidelity Cash Fund

### a sub-fund of Fidelity Investment Funds

W Accumulation Shares (ISIN: GB00BD1RHT82)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- The fund aims to maintain the value of your investment and pay you an income.
- The fund will invest at least 70% in a diversified range of sterling denominated money market instruments and other short-term investments (e.g. bonds).
- Money market instruments are investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer. The buyer receives interest and the return of the original amount at the end of a certain period.
- The remainder will be invested in other cash type investments.
- The fund is actively managed without reference to a benchmark.
- The fund has full discretion in its choices of investments within its objectives and policies.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.
- The fund is a Variable Net Asset Value Money Market Fund (i.e. the price can fluctuate) and operates as a Short-Term Money Market Fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- Investment in a Money Market Fund is different from an investment in deposits, in particular, the principal invested in a Money Market Fund may fluctuate and the risk of loss of the principal is to be borne by the investor.
- The fund is not a guaranteed investment. It does not rely on external support for guaranteeing the liquidity of the fund or stabilising the net asset value of shares in the fund.

## Emerging Markets Fund

a sub-fund of Fidelity Institutional Funds

W Accumulation Shares (ISIN: GB00B9SMK778)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- The fund aims to increase the value of your investment over a period of 5 years or more.
- The fund will invest at least 70% in companies in countries experiencing higher levels of economic growth within Africa, the Indian sub-continent, Latin America, East and South East Asia, Central and Eastern Europe (including Russia) and the Middle East. This includes countries considered to be emerging markets as determined by the investment manager at its sole discretion.
- Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The companies will be either listed, incorporated, domiciled, or have significant business activities in the region.
- The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities.
- The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Emerging Markets (Net Total Return) Index.
- The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.
- In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

## Fidelity Global Dividend Fund

### a sub-fund of Fidelity Investment Funds

W Accumulation Shares (ISIN: GB00B7GJPN73)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- The fund aims to increase the value of your investment, with low volatility versus the MSCI All Country World (Net Total Return) Index. It also seeks to pay you an income that is at least 25% more than the income produced by the companies included in the index.
- The fund will invest at least 70% in companies globally.
- The remainder will be invested in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The Investment Manager will choose investments which it believes offer attractive income in addition to increasing their share price.
- The fund is actively managed without reference to a benchmark.
- The fund has full discretion in its choices of investments within its objectives and policies.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- As the fund aims to generate an income, some charges will be taken from the fund rather than the income generated by the fund. This means the amount payable as income may be increased and the potential to increase the value of your investment may be reduced.
- Shares can usually be bought and sold each business day of the fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.

## Franklin UK Managers' Focus Fund

**Class W (acc) • ISIN GB00B7MPWT49** • A sub-fund of Franklin Templeton Funds  
The management company is Franklin Templeton Fund Management Limited

### Objectives and Investment Policy

Franklin UK Managers' Focus Fund (the "Fund") aims to grow in value by more than the FTSE All-Share Index, from a combination of income and investment growth over a three to five-year period after all fees and costs are deducted.

The Fund invests at least two thirds (but typically significantly more) in shares of companies listed on the London Stock Exchange that are incorporated/domiciled in the UK or which have significant business operations in the UK.

The Fund usually invests in the shares of up to 50 companies consisting of:

- 10-20 large companies (such as those making up the FTSE 100 Index)
- 10-20 medium sized companies (such as those making up the FTSE 250 Index)
- 20 smaller companies (such as those making up the Numis Smaller Companies ex- Investment Trusts Index or the Alternative Investment Market (AIM)).

The Fund can invest to a lesser extent in:

- equity securities of companies not included in the FTSE All Share Index Numis Smaller Companies ex- Investment Trusts Index or AIM;
- other asset classes.

Any proportion of the Fund can be invested into specific industry sectors, but the Fund's managers seek to avoid any unintentional emphasis on a sector in a

way that could increase the level of risk.

The Fund's managers try to further reduce risk by making sure no single company share dominates the Fund's investments. Normally they try to keep shareholdings in any individual company to between 1% and 3% of the Fund's assets.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth).

You may request the sale of your shares on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

#### Terms to Understand

**Equity securities:** Securities that represent an ownership stake in a company.

**FTSE All Share Index:** This index comprises almost every company listed on the London Stock Exchange and is generally considered to be the best performance measure of the overall London equity market.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data

based on a representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund invests mainly in a concentrated portfolio of equity securities of up to 50 small, medium and large UK companies. Such securities have historically been subject to price movements, particularly for the small to medium companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

#### Risks materially relevant not adequately captured by the indicator:

**Concentration risk:** the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

## Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP
- The Fund was launched in 2011 and the present share class on 31/05/2012.
- We measure performance against the Fund's performance target, is the FTSE All-Share Index, as it is widely available and reflects investments in the UK stock market.

■ Franklin UK Managers' Focus Fund Class W (acc)  
■ FTSE All-Share Index

Franklin UK Managers' Focus Fund was launched on 17/10/11 to receive the assets of Rensburg UK Managers' Focus Trust. Past performance for the period from the launch of the Trust has been simulated and is based on the mid-price of the Trust and performance from 17/10/11 up to the launch date of the share class has been simulated by taking the performance of another existing share class of the Fund, which does not differ materially in the extent of its participation in the assets of the Fund.

ISIN GB00BWNGXJ86

First Sentier Investors (UK) Funds Limited (trading as FSSA Investment Managers), the authorised corporate director of the Company

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Objectives and investment policy

**Objective:** The Fund aims to achieve capital growth over the medium to long term (at least three years).

**Policy:** The Fund invests at least 80% in shares of large and mid-sized companies based in or where the majority of their activities take place in the Asia Pacific region (excluding Japan). This includes companies that are listed on exchanges worldwide which provide to exposure to the Asia Pacific region (excluding Japan). These companies generally have a total stock market value of at least US\$1 billion.

The Fund may also invest up to 20% in shares of companies around the world.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

**Strategy:** The Fund's investment strategy is centred on identifying quality companies, buying them at a sensible price and holding for the medium to long-term (at least three years). The Manager looks for founders and management teams that act with integrity and risk awareness, and companies with dominant market positions that have the potential to deliver continual and predictable returns over the medium to long-term.

**Benchmark:** The Fund's performance is compared against the value of the MSCI AC Asia Pacific ex Japan Index.

The Fund is managed with a view to remaining within the Asia Pacific Ex Japan Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition and the Fund's manager has complete discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

## Risk and reward profile

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Single country / specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

## American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");  
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C  
ISIN: GB00B80QG615

**Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.**

### Objectives and Investment Policy

- The Fund aims to provide **growth** over the long term, which is a period of 5 years or more, by tracking the performance of the S&P 500 Index (the "Index").
  - The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
  - The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
  - However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
  - The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
  - The anticipated **tracking error** for the Fund is expected to be up to 0.20%.
- Use of derivatives**
- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
  - Income is reinvested.
  - You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
  - Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

### Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

#### Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

#### Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

## Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2019. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

## Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the S&P 500 Index.
- The Fund was launched on 31 October 1988.

## JPM Japan Fund C - Net Accumulation a Share Class of JPM Japan Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B235RG08

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

## Objective and Investment Policy

**Investment Objective:** To provide capital growth over the long term by investing primarily in the shares of Japanese companies.

### Investment Approach:

- ▶ Uses a fundamental, bottom-up stock selection process.
- ▶ Uses a high conviction approach to finding the best investment ideas.
- ▶ Seeks to identify high quality companies with superior and sustainable growth potential.

**Investment Policy:** Japanese companies are companies that are incorporated under the laws of, and have their registered office in, Japan, or that derive the predominant part of their economic activity from Japan, even if listed elsewhere.

The Fund may have exposure to smaller companies.

The Fund may also use Financial Derivative Instruments (derivatives) for the purpose of Efficient Portfolio Management, including hedging, where appropriate.

The Fund will invest predominantly in assets denominated in Japanese Yen. However, assets may be denominated in other currencies and non-Sterling currency exposure will not normally be hedged back to Sterling.

**Redemption and Dealing:** Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

**Benchmark:** The benchmark of the Fund is TOPIX (Net).

The Fund is actively managed. The Benchmark is a performance comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

**Distribution Policy:** This Share Class will reinvest income.

For an explanation of some of the terms used in this document, please visit the glossary on our website at [www.jpmorgan.co.uk/kiid-glossary](http://www.jpmorgan.co.uk/kiid-glossary).

## Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 6 because its Net Asset Value has shown high fluctuations historically.

### Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.

- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ This Fund is aggressively managed, which may result in higher volatility of the Fund's performance and bigger differences between the performance of the Fund and its benchmark.
- ▶ The single market in which the Fund primarily invests, in this case Japan, may be subject to particular political and economic risks and, as a result, the Fund may be more volatile than more broadly diversified funds.
- ▶ The Fund may be concentrated in a limited number of securities and, as a result, may be more volatile than more broadly diversified funds.
- ▶ The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.
- ▶ For investors in Share Classes which are not hedged to Sterling, movements in currency exchange rates can adversely affect the return of your investment.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

## Charges

### One-off charges taken before or after you invest

**Entry charge** None

**Exit charge** None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from this Share Class over a year

**Ongoing charge** 0.82%

### Charges taken from this Share Class under certain specific conditions

**Performance fee:** None

- ▶ The actual entry and exit charges paid may be less. Information on charges can be obtained from the investor's financial adviser.
- ▶ The Prospectus permits a fee to be charged for switching between Funds but this fee is currently waived by the Authorised Corporate Director.
- ▶ The ongoing charge is based on the last year's expenses to December 2019 and may vary from year to year.
- ▶ Charges are used to pay the costs of running this Share Class. These charges reduce the potential growth of the investment.
- ▶ Further information about charges can be found in "Part 5: Charges and Expenses" section of the Prospectus.

## Past Performance

- ▶ Past performance is not a guide to future performance.
- ▶ Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in GBP.
- ▶ Fund launch date: 1970.
- ▶ Share Class launch date: 2007.

## Jupiter Strategic Bond Fund I-Class

I-Class Accumulation Units, ISIN: GB00B4T6SD53

The Manager is Jupiter Unit Trust Managers Limited.

### Objectives and investment policy

#### Objective

The Fund objective is to provide income with the prospect of capital growth to provide a return, net of fees, higher than the IA £ Strategic Bond Sector Average over the long term (at least five years).

#### Policy

At least 70% of the Fund is invested in global fixed interest securities denominated in sterling or hedged back to sterling. Up to 30% of the Fund may be invested in other assets, including shares of companies (which may be based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash and near cash. The Fund may enter into derivative transactions for investment (i.e. speculative) purposes.

#### Strategy

The fund manager strives to explore the full breadth of the global Fixed Income universe in order to generate performance which is attractive relative to competitor funds by maintaining a balance between macroeconomic and company-level risk.

The portfolio construction process starts with a macroeconomic analysis which determines the willingness to take credit or duration risk, the broad asset allocation of the strategy as well as the geographic areas of focus. The team of credit analysts screens the global credit universe within Developed and Emerging markets to find credits that offer an attractive forward-looking return considering the risk assessment.

The fund manager seeks to maintain a diverse portfolio of investments.

#### Benchmarks

Target benchmark - IA £ Strategic Bond Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA £ Strategic Bond Sector.

#### Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- There is a risk that companies providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- Bonds are very sensitive to interest rate changes and it is possible that bond issuers will not pay interest or return the capital promised. Bonds can also be 'downgraded' by ratings agencies. All of these events can reduce the value of bonds held by the Fund and therefore impact performance.
- The Fund can invest a significant portion of the portfolio in high yield bonds and bonds which are not rated by a credit rating agency. While such bonds may offer a higher income, the interest paid on them and their capital value is at greater risk of not being repaid, particularly during periods of changing market conditions.

- In difficult market conditions, reduced liquidity in bond markets may make it harder for the manager to sell assets at the quoted price. This could have a negative impact on the value of your investment. In extreme market conditions, certain assets may become hard to sell in a timely manner or at a fair price. This could affect the Fund's ability to meet investors' redemption requests upon demand.
- This Fund may use derivatives for investment purposes which may cause large fluctuations in the value of the Fund. Investments in financial derivative instruments can introduce leverage risks which can amplify gains or losses in the Fund.

## Charges

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

### Charges taken from the Fund over a year

Ongoing charges	0.73%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure excludes the costs of buying or selling assets for the Fund (unless those assets are shares of another fund). A change to the Fund's charging structure took effect on 29/05/2020. The ongoing charges figure with effect from that date is fixed. The annual report and accounts for the Fund will include details of the exact charges made.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

## Past performance

## Legal & General Cash Trust

### Class I Accumulation - ISIN: GB00B0CNHB64

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

## OBJECTIVES AND INVESTMENT POLICY

- **The pricing methodology for this Fund will change on 1 December 2020.** See <https://www.legalandgeneral.com/investments/funds/prices-and-reports/single-swing-pricing/>
  - The objective of this Fund is to maintain capital and to provide a return in line with money market rates, before charges.
  - The Fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan which pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price.
  - In stressed market conditions, the Fund may be invested up to 100% in government and public securities issued by a single issuer.
  - The maximum maturity of the instruments the Fund invests in is 397 days but the Fund must maintain a weighted average maturity of less than 60 days.
  - The bonds that the Fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
  - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
    - reduce risk or cost; or
    - generate additional capital or income with no, or an acceptably low, level of risk.
  - The Fund may also invest in other fixed income securities, other money market instruments and collective investment schemes.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to pick investments to achieve the Fund's objective.
  - There is no representative target or constraining benchmark available for this Fund.
  - The Fund is a short-term variable net asset value money market fund.
  - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
  - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
  - The Fund's base currency is denominated in sterling (British pounds).
  - This Fund is designed for investors looking to preserve their money from an investment in deposits and short term instruments.
  - This Fund may be appropriate for investors looking to invest for a short period of time.
  - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

## RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 1 as it invests in instruments which are very liquid, have short maturities which have a high credit rating and are considered lower risk than longer maturing securities.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depository.
- The Fund has money on deposit with companies such as banks or other financial institutions and invests in bonds which are issued by the government. If these companies or the government experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- When interest rates are low and if the Fund's income is not enough to pay charges, the Fund's capital will be used instead. This may cause the value of the Fund to fall.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%*
Exit charge	0.00%*

This is the maximum that might be taken out of your money before it is invested.

\*The Fund also incurs a unit price spread. See opposite.

### Charges taken from the fund over a year

Ongoing charge	0.15%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2019. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

#### Other costs:

- **Unit price spread:** on any day, the prices for buying or selling units in this Fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund.
- The difference between the maximum and minimum price, which is the most the price can change, can vary but as an example, the maximum price for units in this Fund was 0.00% higher than the minimum price at 31 August 2020.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1992.
- This unit class launched in 2005.
- To assess the performance of the Fund, it can be compared to the IA sector, Short Term Money Market (referred to as the "Comparator" in the chart opposite).
- **Please note that performance up to 2015 shown in this graph was achieved under a different investment approach which no longer applies. Performance after 2015 is under the current investment approach, which started on 28 April 2016.**

## LF Miton US Opportunities Fund, B Institutional Accumulation Share, a fund within LF Miton Investment Funds 3 (ISIN: GB00B8278F56)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

### Objective and investment policy

#### Objective

To achieve long-term total returns (the combination of income and capital growth). There is no guarantee that a positive return will be delivered.

#### Investment Policy

To invest at least 70% in the shares of North American companies but may also invest in other funds and cash.

#### Essential features of the fund:

- The fund has the discretion to invest without the need to adhere to a particular benchmark.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives may be used to manage the risk profile of the fund, reduce costs or generate additional capital or income.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Concentration Risk: The fund may invest in stocks within a particular industry or sector and will have a geographical focus. The fund is therefore more likely to be subject to large swings (both up and down) in its value than other funds which invest more broadly.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.90%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses for the year ended 31 May 2020. This figure may vary from year to year. The ongoing charges are taken from the capital of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see the prospectus sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

## Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in March 2013.
- Performance is calculated in Pounds Sterling.

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
  - Intellectual property
  - Strong distribution channels
  - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management. Companies are also assessed for employee ownership below the board and changes in equity ownership are monitored.

## Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 for its exposure to UK companies.
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may encounter liquidity constraints from time to time. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

## M&G Global Emerging Markets Fund

a sub-fund of M&G Investment Funds (7)

Sterling Class I – Accumulation shares ISIN no. GB00B3FFXX47

Managed by M&G Securities Limited

### Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the ongoing charge figure, that is higher than that of the MSCI Emerging Markets Index over any five-year period.

**Core investment:** At least 80% of the fund is directly invested in the shares of companies that are based, or do most of their business, in emerging markets.

**Other investments:** The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

**Derivatives:** The fund may use derivatives to reduce the risks and costs of managing the fund.

**Strategy in brief:** The fund manager selects stocks using a bottom-up approach across a range of sectors. A long-term perspective is adopted to identify companies whose long-term prospects are, in the fund manager's opinion, being undervalued. It is the core belief of the fund manager that corporate governance and company-specific factors, in particular their profitability (which is measured in terms of return on capital), drive share prices over the long run. The fund's country and sector exposure is not influenced by top-down views.

**Benchmark:** MSCI Emerging Markets Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents. For unhedged and hedged share classes, the benchmark is shown in the share class currency.

You can find more information about the objective and investment policy of the fund in the Prospectus.

You can find an explanation of some of the terms used in this document in the glossary at <https://docs.mandg.com/docs/glossary-master-en.pdf>

#### Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

**Recommendation:** This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

• The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its Net Asset Value has shown high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.95%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 1 August 2019.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.95%. The fund's annual report for each financial year will include details on the exact charges made.

**For more information on charges, please see the relevant sections of the Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)**

## Past performance

- Past performance is not a guide to future performance.
- Performance calculation includes UK taxes. It does not take into account the entry and exit charges but does take into account the ongoing charge and the Performance fee, as shown in the charges section.
- The fund launched on 05 February 2009 and the Sterling Class I Accumulation share class launched on 05 February 2009.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.

## Royal London Short Duration Credit Fund (Income - Class M Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BJ4KW800  
Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The Fund's investment objective is to achieve a total return over the medium term (3-5 years) by investing at least 80% in sterling-denominated bonds, of which at least 70% will be short duration (5 years or less).

The Fund's performance target is to outperform the ICE Bank of America Merrill Lynch 1-5 Year Sterling Non-Gilt Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

**Policy** At least 80% of the Fund will be invested in the bonds of companies and other organisations (known as corporate bonds) that are listed in sterling, of which 70% will have a duration of less than five years. Floating-rate notes, asset-backed securities, supranational bonds and agency bonds are included in this segment of the Fund.

The remainder of the Fund's assets may be invested in a range of securities, including UK government bonds, the bonds of companies and other organisations that are listed in a currency other than sterling and preference shares. A limited amount may also be invested in bonds with a duration greater than five years and up to 10% can be invested in other funds, known as collective investment schemes.

A limited amount of the Fund's assets may be invested in other transferable securities and money market instruments. The Fund may also hold a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management.

Cash is unlikely to exceed 5% of assets.

For more information on investment terms used in this document please refer to the glossary on our website:

<https://www.rlam.co.uk/Home/Intermediaries/Supplementary-links/Glossary/>.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Bonds** are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

**Total Return** A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

**Rolling 5 Year Period** A rolling 5-year period is any period of five years, no matter which day you start on.

**Duration** is an investment's sensitivity to interest-rate changes measured in years.

**Efficient Portfolio Management** A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

The Fund is ranked in risk category 3 because its simulated share price has shown a low to medium level of volatility historically. The Fund was formed by merger and the SRR1 was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Credit Risk** Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/](https://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/))

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

Entry charge	None
--------------	------

Exit charge	None
-------------	------

### Charges taken from the fund over a year:

Ongoing charge	0.35%
----------------	-------

### Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure shown is an estimate of the charges because the share class only launched on 12 April 2019. The annual report for each financial year will include details on the exact charges made.

For more information about charges, see the expenses section in the full Prospectus and supplement, available at [www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

# Global Focused Growth Equity Fund

a sub-fund of T. Rowe Price Funds OEIC

Class C Acc (ISIN: GB00BD446774)

Authorised Corporate Director: T. Rowe Price UK Limited

## Objectives and Investment Policy

**Objective** To increase the value of its shares through growth in the value of its investments.

**Portfolio securities** The fund is actively managed and invests mainly in a diversified portfolio of shares which, in the opinion of the investment manager, have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets.

The fund may use derivatives for hedging and efficient portfolio management.

**Investment process** The investment manager's approach is to:

- Identify "best ideas" by assessing companies in a global sector context, using a bottom-up approach to create a focused high-conviction portfolio.
- Utilise a proprietary global research platform using fundamental analysis to identify companies with superior and sustainable growth prospects, and improving fundamentals.
- Integrate macroeconomic and local market factors in stock selection decisions.
- Measure valuation appeal against the local market and broad sector opportunity set.
- Invest in a broad range of stocks across all capitalizations, incorporating developed and emerging markets.
- Assess environmental, social and governance ("ESG") factors to identify those considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund's portfolio.

**Designed for** Investors who typically plan to invest for five years or more.

**Fund reference currency** GBP

**Benchmark** MSCI All Country World Index Net.

**Benchmark Use** Investors may use the benchmark to compare the fund's performance. The benchmark has been selected because it is similar to the investment universe used by the investment manager and therefore acts as an appropriate comparator.

The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark and has complete freedom to invest in securities that do not form part of the benchmark.

## Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market where volatility is moderately high.

The fund's risk level reflects the following:

- As a class, stocks carry higher risks than money market securities and bonds.

### MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

The fund's main risks are at least partially reflected in the risk/reward number. The most important of these risks are:

**Capital erosion** When insufficient income is received by the fund, charges may be paid against capital. Investors should be aware that if deductions are made from capital, this will result in capital erosion and constrain capital

### TERMS TO UNDERSTAND

**Active management** Where an investment manager makes specific investment decisions with the goal of producing better returns than simply investing in line with a benchmark index (a strategy generally known as "passive").

**Derivatives** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

**Emerging markets** Countries whose securities markets are less established than those of developed countries. Examples include many countries in Africa, Asia, Eastern Europe and South America.

**Equities (stocks)** Securities that represent partial ownership of a company.

**Hedging** Seeking to reduce or cancel out exposure to various investment risks.

#### The Sub-Fund may appeal to investors who:

- are interested in investment growth
- are looking to diversify their equity investments
- understand and can accept the risks of the fund, including the risks of investing in equities globally.

Income generated by the fund is reinvested and included in the value of its shares.

*Orders received and accepted by 12:00 noon on a business day will generally be processed that day.*

growth.

**Emerging markets** Emerging markets are less established than developed markets and therefore involve higher risks.

**Small and mid cap stock** Stocks of small and mid-size companies can be more volatile than stocks of larger companies.

**Style** Different investment styles typically go in and out of favor depending on market conditions and investor sentiment. At any given time, for instance, a growth-style portfolio may underperform a value-style portfolio, or vice-versa, and either may at any time underperform the market as a whole.

### MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS

Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other risks, such as:

**Operational** A fund may be subject to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, and trading, among other things. In addition, in any market, but especially in emerging markets, there could be losses due to fraud, corruption, political or military actions, the seizure of assets, or other irregular events.

A more detailed description of the risks that apply to the fund is set out in the section "Risk Descriptions" in the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.92%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The **entry and exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your distributor or financial adviser.

The **ongoing charges** figure is based on expenses for the year ending 12/2019. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units/shares in another collective investment undertaking.

**For more information about charges, please see the section entitled "NOTES ON FUND COSTS" and in the fund's prospectus, which is available at [troweprice.com](http://troweprice.com).**

## Past Performance

The past performance indicated is not a reliable indicator of future performance.

The past performance calculation includes all ongoing charges, but excludes any entry charge applied.

The fund and class started to issue shares in 2017.

Past performance has been calculated in GBP.

When a share class is hedged to a different currency, a hedged version of the benchmark (where available) will be used by the Authorised Corporate Director for the performance comparison.

## Practical Information

The fund's depositary is J.P. Morgan.

Further information about the fund, copies of its prospectus, latest annual report and any subsequent half-yearly report can be obtained, free of charge, from J.P. Morgan, or at [troweprice.com](http://troweprice.com). These documents are available in English and certain other languages (fully detailed on the website).

The latest share prices can be obtained from J.P. Morgan.

The tax legislation of the UK, the fund's home Member State, may have an impact on the personal tax position of the investor.

T. Rowe Price UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the fund.

Investors in the fund have the right to exchange their shares in the fund for shares in another sub-fund. Information about how to exercise this right is contained in the section of the prospectus entitled "Conversion of Shares".

This document describes a sub-fund of T. Rowe Price Funds OEIC and the prospectus and periodic reports referenced in this document are prepared for the whole of the T. Rowe Price Funds OEIC. The assets and liabilities of each sub-fund are segregated by law, which means that third party creditors have recourse only to the sub-fund having incurred the liability.

Investors can obtain information about the other classes of the fund in the appendix to the prospectus describing this fund.

The details of the up-to-date remuneration policy statement setting out the key remuneration elements, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee, are available on the website [https://www.troweprice.com/content/dam/trowecorp/Pdfs/TPRUK\\_Remuneration\\_Policy.pdf](https://www.troweprice.com/content/dam/trowecorp/Pdfs/TPRUK_Remuneration_Policy.pdf). # Japanese Equity Fund

a sub-fund of T. Rowe Price Funds OEIC

Class C Acc (ISIN: GB00BD446L18)

Authorised Corporate Director: T. Rowe Price UK Limited

## Objectives and Investment Policy

**Objective** To increase the value of its shares through growth in the value of its investments.

**Portfolio securities** The fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies in Japan.

The fund may use derivatives for hedging and efficient portfolio management.

**Investment process** The investment manager's approach is to:

- Consider macroeconomic factors in the implementation of a primarily bottom-up and research driven process.
- Seek growth opportunities across the market capitalization and market sector spectrums.
- Manage risk at stock, sector, and market cap-range levels.
- Use portfolio rebalancing as an effective risk management tool.
- Assess environmental, social and governance ("ESG") factors to identify those considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund's portfolio.

**Designed for** Investors who typically plan to invest for five years or more.

**Fund reference currency** GBP

**Benchmark** TOPIX Index Net.

**Benchmark Use** Investors may use the benchmark to compare the fund's performance. The benchmark has been selected because it is similar to the investment universe used by the investment manager and therefore acts as an appropriate comparator.

The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark and has complete freedom to invest in securities that do not form part of the benchmark.

## Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market where volatility is moderately high.

The fund's risk level reflects the following:

- As a class, stocks carry higher risks than money market securities and bonds.

### MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

The fund's main risks are at least partially reflected in the risk/reward number. The most important of these risks are:

**Capital erosion** When insufficient income is received by the fund, charges may be paid against capital. Investors should be aware that if deductions are made from capital, this will result in capital erosion and constrain capital growth.

**Small and mid cap stock** Stocks of small and mid-size companies can be more volatile than stocks of larger companies.

**Style** Different investment styles typically go in and out of favor depending on market conditions and investor sentiment. At any given time, for instance, a growth-style portfolio may underperform a value-style portfolio, or vice-versa, and either may at any time underperform the market as a whole.

### TERMS TO UNDERSTAND

**Active management** Where an investment manager makes specific investment decisions with the goal of producing better returns than simply investing in line with a benchmark index (a strategy generally known as "passive").

**Derivatives** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

**Equities (stocks)** Securities that represent partial ownership of a company.

**Hedging** Seeking to reduce or cancel out exposure to various investment risks.

### The Sub-Fund may appeal to investors who:

- are interested in investment growth
- are looking to diversify their equity investments
- understand and can accept the risks of the fund, including the risks of investing in the equities of smaller companies.

Income generated by the fund is reinvested and included in the value of its shares.

## THREADNEEDLE EUROPEAN SELECT FUND (THE "FUND")

Class Z Net Accumulation Shares (GBP) GB00B8BC5H23, a sub-fund of Threadneedle Investment Funds ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

### Objectives and Investment Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the FTSE World Europe ex UK Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 75% of its assets in a concentrated portfolio of shares of companies domiciled in Continental Europe, or which have significant Continental European business operations.

The Fund selects companies in which the fund manager has a high conviction that the current share price does not reflect the prospects for that business. These companies may be chosen from any industry or economic sector, with significant sector and share weightings taken at the fund manager's discretion. There is no restriction on company size, however, investment tends to focus on larger companies, such as those included in the FTSE World Europe ex UK Index.

The FTSE World Europe ex UK Index is regarded as providing an appropriate representation of the share performance of large and medium-sized companies across Europe (excluding the UK), currently with approximately 500 companies included. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

The Fund typically invests in fewer than 50 companies, which may include shares of some companies not within the Index. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

Income from investments in the Fund will be added to the value of your shares.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds".

For more information on investment terms used in this document, please see the Glossary published in the Document Centre on our website: [www.columbiathreadneedle.com](http://www.columbiathreadneedle.com).

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards

Higher Risk, Typically higher rewards

- The Fund is rated 5 because historically it has shown a medium to high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund has a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry Charge:	3.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing Charges:	0.80%
------------------	-------

### Charges taken from the fund under specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure shown here is an estimate of the charges because recent changes made to the Fund mean that the historic figures do not accurately reflect its ongoing costs. The UCITS' annual report for each financial year will include detail on the exact charges made.

## Past Performance

Source: Morningstar

Past performance is not a guide to future performance.

Fund launch date: 31/10/1986

Share/unit class launch date: 01/10/2012

Performance is calculated in GBP.

## Vanguard Global Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

## GBP Hedged Acc

ISIN: IE00B50W2R13

Manager: Vanguard Group (Ireland) Limited ("VGIL")

## Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Barclays Global Aggregate Float Adjusted and Scaled Index (the "Index").
- The Index includes investment-grade and government bonds from around the world with maturities greater than one year.
- The Index is a market-weighted index of global government, government-related agencies, corporate and securitised fixed income investments with maturities greater than one year.
- The Fund attempts to:
  1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
  2. Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for

the purposes of the "Past performance" section below, the performance of this share class is shown against the Bloomberg Barclays Global Aggregate Float Adjusted and Scaled Index in GBP (the "Hedged Index"), which is a currency hedged version of the Index.

- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&dclid=11630>

**For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "prospectus") on our website at <https://global.vanguard.com>**

## Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
  - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.

## The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

**For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>**

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Charges taken from the Fund over a year	
Ongoing charges	0.15%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less.

Investors can find out the actual entry and exit charges from their financial adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2019. This figure may vary from year to year. It excludes portfolio transaction costs.

**For further information about charges, please see the sections entitled "Buying Shares", "Redeeming Shares", "Fees and Expenses", Appendix 1, and the "Swing Pricing" section in Appendix 2 of the prospectus on our website at <https://global.vanguard.com>**

## Past performance

### • Past performance:

1. **Is not a reliable indication of future performance.**
  2. Includes ongoing charges and the reinvestment of income. It excludes entry and exit fees.
  3. Has been calculated in GBP.
- Shares in the Fund were first issued in 2008. This share class was launched in 2009.

## Practical information

- **Depository:** The Vanguard Investment Series plc ("VIS") depository is Brown Brothers Harriman Trustee Services (Ireland) Limited.
- **Documents, prices of shares and further information:** You can obtain copies of the prospectus and the latest annual and semi-annual report and accounts for VIS, along with the latest published prices of shares and other information on the Fund, free of charge from Vanguard Investment Series plc c/o Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329, Ireland or from our website at <https://global.vanguard.com>. These documents are available in English only.
- **Sub-funds:** VIS is an umbrella fund with segregated liability between sub-funds. This means that the holdings of the fund are maintained separately under Irish law from holdings of other sub-funds of VIS and your investment in the Fund will not be affected by any claims against any other sub-fund of VIS.
- **Prices:** The last published prices of units in the Fund are also available from the FT's website [www.ft.com](http://www.ft.com) or <https://global.vanguard.com>
- **Shares:** You may exchange your shares in the Fund for shares in any other sub-funds of VIS. An entry charge may apply. Details of switching are provided in the prospectus.
- **Tax:** Irish tax legislation may have an impact on your personal tax position. You are recommended to consult your professional tax adviser.
- **Liability:** VGIL may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for this Fund.
- **Remuneration policy:** Details of VGIL's Remuneration Policy are available at <https://global.vanguard.com/portal/site/portal/ucits-investment-information>, including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, on request from VGIL at 70 Sir John Rogerson's Quay, Dublin 2, Ireland.
